DOB: 6.11.63

Senior Electrical Engineer

QUALIFICATIONS:

HNC Building Engineering Services Electrical

OTHER QUALIFICATIONS:

Full UK Driving Licence

Obtained high level of security clearance

PROFILE:

I have been an Electrical Building Services Engineer for over 38 years, initially as an estimator for 5 years but mainly as a Design Engineer for some 33 years.

I have been employed by a multi discipline Contractor but in the main with building services design consultants working on numerous project types, ranging from commercial, process plant, high end domestic properties and more recently hospitals.

Apart from building services design I have experience in surveying buildings as part of condition surveys and asset registers.

I have been an equity Director of three companies. At present I am now working on a contract basis but still employed by my own company. My clients have been in both the public and private sectors.

My main strengths are being an honest, confident communicator, competent, diligent and conscientious person. I consider myself to have a good sense of humor. I have worked as a team and independently and comfortable talking to end users and heads of practice and members of the general public.

I have working knowledge of Word, Outlook and Excel packages.

CAREER:

GDM Partnership Ltd – September 2018 -Present
Senior Electrical Engineer-Contract Basis

Employed to initially to develop the conceptual design of a Cat B fit out for HSBC's new offices in Sheffield

Other projects worked on comprised small Cat A fit out of offices in Brighton and a retail outlet in Mafair.

Apart from the day to day design I represented GDM at design and progress meetings.

I reported directly to the associate directors.

Eta Projects Ltd - October 2013-August 2018
Senior Electrical Engineer-Contract Basis

Employed initially to complete the design on St Thomas' Hospital A&E department and carried out project supervision for the full five phases over a term of four years.

Within this period I also worked on numerous other healthcare projects comprising CT and MRI scanner installations, CSSD and commercial premises.

My role within the company is to assist as part of an M&E team preparation of design drawings, specifications, attend post tender interviews and assist with the process of shortlisting potential Contractors. During the various contracts on behalf of Eta I have attended meetings with the design team, end users and Contractors, overseen the installation of the various systems, provide progress reports and costing information for formal payments.

John Melville Partnership (JMP) -1992-2018
Electrical Engineer and Director

I was initially employed as an Intermediate Electrical Engineer and through progression became a Senior Electrical Engineer. In 2003 I become a Director of JMP.

John Melville Partnership was a multi-discipline design consultancy and FM company whose key clients were from the public and private sectors.

Apart from design duties the company offered facilities management and I gained experience in preparing maintenance specifications, auditing of maintenance contracts, asset registers and condition surveys.

Ian Monteith Associates –1991-1992
Intermediate Electrical Engineer

I was employed on a short term contract basis as an Intermediate Engineer, carrying out design duties for large commercial premises. My key role was carrying out design and survey duties for private and public clients.

John Yates Associates -1990-1991
Intermediate Electrical Engineer

I was employed as an Intermediate Engineer. My key role was carrying out design and survey duties for private and public clients with a strong architectural theme.

Harding McDermott and Partners -1985-1990
Junior Electrical Engineer

I joined my first design consultancy as a Junior Engineer working alongside and under the supervision of a Senior Engineer. Within two years I had progressed to an Intermediate Engineer. My key roles were carrying out design and survey duties for private and public clients but in main hospital projects.

Drake and Scull -1980-1985**Junior Electrical Estimator**

I was employed as a junior estimator under an apprenticeship scheme. My key role was reading tender specifications, measuring drawings, quantifying and preparing take off sheets for Comptometer operators to provide the final estimated costs. Within 3 months I was moved to the international division of the company in Croydon where I gained experience in the overseas market. In my time at Drake and Scull I completed my apprenticeship and received my ONC and subsequently the HNC.
